No-Flush Niacin 75 capsules
#70370

Buy

Provides inositol hexanicotinate, a compound of nicotinic acid (niacin) with inositol. Taken orally, the niacin releases slowly, thereby minimizing the likelihood of "niacin flush". Though chemically linked to inositol, the niacin in this formulation is highly bio-available.

**Each capsule contains:**
Niacin (as Inositol Hexanicotinate) 430 mg
**Other ingredients:**
Cellulose, silicon dioxide, magnesium stearate.

**Suggested Use:**
As a dietary supplement, 1 capsule two or three times daily with meals, or as directed by a health practitioner.
