- Vitamin C is an essential nutrient for humans and must be consumed daily.[1] Vitamin C, a known antioxidant,[2] is essential for proper immune cell function.[3]
- Ester C is a patented form of vitamin C which has demonstrated superior absorption over other forms of vitamin C.[4] It has been shown to enter the bloodstream twice as fast and remain in the body twice as long as ascorbic acid[4] and is excreted from the body at a slower rate.[5] Ester C also has been shown to increase tissue concentrations of vitamin C more significantly than other sources.[5]
- *Astragalus* is a potent immune enhancing herb that has been used as a tonic in China for centuries. Studies suggest it may provide nutritional support for healthy immune function.[6-11]
- Oregano shown inhibition of several pathogenic bacteria and fungi.
- Olive leaf, standardized to18% of the active compound oleuropin, exhibits antimicrobial and antiviral activity.
- As part of a healthy diet, the select combination of premium mushrooms has shown immune enhancement via activation of various immune cells.
