OcuGuard Plus Caps

Ocuguard Plus capsules contain a special blend of specific multi-vitamins (more than 14 in all!) all designed to help protect the eyes.

The "Plus" in OcuGuard Plus refers to the additional breakthrough nutrient called lutein. A day's supply contains 80 times the trace amounts found in the leading multi-vitamin! This carotenoid is abundant in fruits and vegetables, and is also a potent antioxidant highly concentrated in the macula of the eye (the back part of the retina where entering light hits and sends signals to the brain for sight).

Research shows that lutein can serve as your body's own "internal sunglasses," helping to block out visible blue light, the major cause of photic (light induced) damage to the eye.* The problem is, as we age, our supply of lutein dwindles. The natural solution? Ocuguard Plus with Lutein.
