Buffalo Liver

Buffalo Liver capsules are prepared with liver from a private herd of range-fed young buffalo, naturally raised on unsprayed land high in the mountains. These buffalo are NOT treated with antibiotics, steroids, or other drugs. To retain nutrients, the buffalo liver has been freeze-dried. Each capsule contains 500 mg of whole buffalo liver. One-half ounce of fresh liver is used to produce 6 Carlson Buffalo Liver capsules. Buffalo Liver is naturally rich in vitamins, minerals and other nutrients. It is excellent for maintaining and building healthy blood.
