Primadophilus for Kids, Chewable

Description
Designed specifically with children age 2-12 in mind, Primadophilus for Kids chewable tablets contain a special blend of Bifidobacterium longum, Lactobacillus acidophilus and L rhamnosus.

Usage
Each great tasting orange tablet is an easy way to ensure that your child is getting the necessary friendly flora to maintain a healthy balance in the intestines. Under normal conditions, trillions of bacteria exist in the intestines. As part of the body's defenses they help maintain good health by preventing harmful microorganisms from infiltrating the body. Medications taken to combat illness or infection can reduce the number of beneficial bacteria as an unwanted side effect. To maintain the healthy balance, add Primadophilus for Kids chewable tablets to your child's daily health regimen.*

Recommended Daily Dosage
Take one tablet(1 billion bifidobacterium and Lactobacillus microorganisms) per day. Intensive dosage: After two weeks at the usual dosage, intake may be increased to one tablet three times per day. At time of manufacture
