USAGE: Take 1 scoop once or twice a day, or as directed by your qualified health consultant.

Jarrow Formulas® MSMSulfur™ is an organic source of bioavailable sulfur, an antioxidant mineral found in major structural molecules of the body such as cartilage. The sulfur from MSM is used to produce glycosaminoglycans (or mucopolysaccharides) such as chondroitin sulfate, dermatan sulfate and hyaluronic acid. These sulfur containing glycosaminoglycans are found in high concentrations in connective tissue, including joint cartilage, skin and collagen.

Do NOT take if pregnant, lactating, trying to conceive, or have a medical condition.
For best results, use with Jarrow Formulas® BioSil™, the concentrated, Biologically Active Silicon for stronger, healthier bones, joints and skin.
Keep out of the reach of children.
