Usage
Chlorofresh is used chiefly as an aid to reduce odor from a colostomy or ileostomy and to reduce fecal odor due to incontinence. However, Chlorofresh capsules also work effectively as an internal breath freshener.*

Recommended Daily Dosage
Adults and children 12 years of age and older: take two capsules one or two times daily. If odor is not controlled an additional two capsules may be taken, but do not exceed six capsules per day. The smallest effective dose should be used. Children under 12: consult a doctor before use. For additional odor control, one or two capsules may be added to an empty colostomy or ileostomy bag.

The following list is for serving size of 1 softgel

Product Q&A

1. Is Chlorophyll toxic?
   Chlorophyll is not known to be toxic.

2. Do the soft gels contain dye?
   No. The dark green color comes from the sodium copper chlorophyllin in this product.
