Product Q&A

1. Does Nature's Way Korean White Ginseng have a guaranteed potency?
   We guarantee a minimum ginsenoside potency of 2%.

2. What makes this Ginseng different from the others?
   The main difference is the type and amount of ginsenosides. Ginsenoside Rg1 is found in higher amounts and proportions than in P. quinquefolius. This particular compound is responsible for Central Nervous System (CNS) stimulation.
