Since 1973
Recommended By Leading Doctors

Gluconic® DMG 500 mg

A dietary supplement to support immune system, circulatory, cardiovascular, and neurological functions; muscle recovery and endurance.* Dimethylglycine (DMG) is a nutrient which is found in the cells of both plants and animals. The human body produces DMG in very small amounts.

Supplementing the diet with higher levels of DMG greatly improves the nutritional environment of the cell. Dimethylglycine has been found effective in supporting immune system function and better utilization of oxygen at the cellular level.*

DaVinci Laboratories has been issued four U.S. Patents for N, N-Dimethylglycine's value and use in improving immunity and for benefiting cellular processes. DMG reduces lactic acid build up in the muscle thereby shortening recovery time after strenuous exercise and improving endurance.*

Available in 125 mg sublingual, 250 mg or 500 mg chewable tablets and a 300 mg per ml liquid formula.

Gluconic® DMG 500mg

2393.6 (60 tablets)
