Hyaluronic Acid from Bio-Cell Collagen II™

Promotes Healthy Joints

enlarge bottle

Hyaluronic acid is a major component of joint tissue. It helps to hold lubricating moisture in joints and cartilage, which affects their resilience, elasticity, and strength. Source Naturals Hyaluronic Acid from patented BioCell Collagen II™ has undergone an absorption enhancing hydrolyzation process that yields low molecular weight hyaluronic acid, chondroitin sulfate, and Collagen Type II peptides. These elements make it a multifaceted ingredient, which may help support joint function and the appearance of healthy skin.

Supplement Facts for 50 mg
