Supplements

Mega Zinc 100 mg Sustained Release Tablets

Product No. 3660

Zinc has traditionally been linked to cellular growth and repair, with impacts seen in vision, taste and smell, and supporting the immune system. This mineral element is also present in dozens of enzymes that are essential to digestion and metabolism. Manufactured with the Biotron process of amino acid chelation, which ensures maximum absorption and mineral usage throughout the body. A special base encourages slow, sustained release of zinc over a prolonged period.

Bottles of 90 #3660
