Coenzymated™ B-2

FMN (Flavin Mononucleotide) Sublingual

enlarge bottle

Flavin mononucleotide (FMN) is involved in a wide array of enzymes and has many roles in producing energy from our food, as well as in bioconverting B-6 to its coenzyme form. FMN is converted in the body into flavin adenine dinucleotide (FAD), another coenzyme, which is responsible for regenerating the important antioxidant glutathione.

Supplement Facts

Serving Size: 1 tablet

	Amount	%DV
Riboflavin (from 25 mg flavin mononucleotide [Coenzymated™])	18 mg	10.59
