

Beta Glucan

Purified Beta Glucan 1,3/1,6 * 100 mg and 250 mg

enlarge bottle

Beta Glucan is a unique polysaccharide derived from baker's yeast. Animal and human cell culture studies have shown that beta glucan can stimulate several aspects of immune function, such as phagocytosis and interleukin production. Phagocytosis is the process of a white blood cell engulfing and destroying a foreign substance. Interleukin is a chemical mediator that triggers white blood cell production and activity. Beta Glucan 1,3/1,6 is a highly potent form of beta glucan. It is purified using a process that removes the mannoprotein and yeast residues in the yeast cell well. These compounds may interfere with beta glucan's activity.

Supplement Facts for 100 mg

Serving Size: 1 capsule

	Amount	%DV
Beta-1,3/1,6-Glucan	100 mg	

Other Ingredients:

Warning:

Suggested Use: One capsule daily before a meal.

Supplement Facts for 250 mg

Serving Size: 1 tablet

	Amount	%DV
Beta-1,3/1,6-Glucan	250 mg
