

Acid-A-Cal™

Supports balanced pH levels for proper calcium absorption†

Dietary Supplement

Product Numbers: 01151

Product Quantities: 100 Capsules

The body must maintain the proper acid-alkaline (pH) balance to function at optimal levels. Overly alkaline body fluids can make calcium harder to absorb. And calcium is essential for strengthening bones.†

Acidifying compounds such as ammonium chloride, betaine hydrochloride, and calcium phosphate can help support balanced pH levels.†

Acid-A-Cal™ provides these compounds along with important vitamins, minerals, and other natural factors. Acid-A-Cal is available in capsule form for easy assimilation.

Product Nutrient Categories: Glandular Herbal Mineral Vitamin

Recommendations: Two capsules with each meal and at bedtime.

Capsule Size: 00

Serving Size: 2 Capsules	**Amount/Serving**	**%DV**
