Primadophilus Junior

Description

Primadophilus Junior is an enteric coated, high potency probiotic product, in a convenient once daily dose. Primadophilus Junior is especially designed for children 6 -12 years of age. It contains specially selected strains of freeze-dried microorganisms in a neutral base. Our product is kept refrigerated throughout the manufacturing process and should be kept in the refrigerated section of your local Nature's Way retailer.

Usage

Primadophilus Junior is designed to deliver helpful bacteria to the gut. These microorganism strains are essential to maintaining healthy intestinal flora. Under normal conditions, trillions of bacteria exist in the intestines. As part of the body's defenses they help maintain good health by preventing harmful microorganisms from infiltrating the body. Medications taken to combat illness or infection can reduce the number of beneficial bacteria as an unwanted side effect. To maintain the healthy balance add Nature's Way Primadophilus Junior to your child's daily health regimen.*

Recommended Daily Dosage

Take one Primadophilus Junior capsule (1 billion Bifidobacterium and Lactobacilli) per day. Intensive dosage: After two weeks at the usual dosage, intake may be increased to one Primadophilus Junior capsule three times per day. To maintain maximum potency, keep refrigerated.

The following list is for serving size of 1 capsule (proprietary formula)

Primary Ingredients
Bifidobacterium breve
Bifidobacterium infantis
Bifidobacterium longum
Lactobacillus acidophilus
Lactobacillus rhamnosus
Proprietary Blend

Other Ingredients

Gelatin, Gelatin Enteric Coating, Magnesium Stearate, Maltodextrin, Vitamin C (ascorbic acid)

Sizes & Suggested Retail Price

90 capsules - $14.95

Where to BUY?

Synergistic Products

Astragalus
EchinaGuard, Liquid Extract
Garlicin
Sambucol™ Immune System Formula Extract

Quality Issues

Product Quality Issues: With extra small, easy-to-swallow capsules, Primadophilus Junior contains strains of beneficial bacteria in proportions found naturally in pre-teen children. Potency: Maximum potency of 5.2 billion microorganisms per gram (1 billion Bifidobacterium and lactobacilli per capsule). 100% Intestinal Release Difference: Each Primadophilus Junior capsule has a proprietary enteric coating that completely withstands stomach acid so it can release its full potency into the intestine tract. Without this feature up to 95% of the cultures would be lost in the stomach.
