Chlorophyll Extract

Often considered the "blood" of plants, chlorophyll is structurally similar to hemoglobin. It has a protective and detoxifcation action.

Who would benefit from this supplement? Those with heavy metal toxicity and those looking for cleansing and detoxification properties. Those with bad breath and body odor. Those suffering from fatigue and those with slow healing wounds.

Phyto-Tech™ Chlorophyll provides 100 mg Chlorophyll, from Mulberry leaf, per 30 drops.

Dosage: 15-30 drops in water or juice, 1-2 time daily, or as needed

Supplemental Information:

Chlorophyll is the sunlight collecting molecule in plants that gives them their green pigment. Plants use chlorophyll to collect light needed for photosynthesis. Through photosynthesis Chlorophyll molecules have the ability to convert solar energy into chemical energy by manufacturing carbohydrates from carbon dioxide and water.

Chlorophyll is often referred to as the "blood" of plants. Interestingly, Chlorophyll molecules are structurally very similar to human hemoglobin molecules. The difference between the two being that Chlorophyll carries Magnesium at its center and hemoglobin carries iron at its center. Like iron, Chlorophyll helps the body build red blood cells and thus increases oxygen availability. It energizes and revitalizes the body and is helpful for fatigue, shortness of breath, asthma, altitude sickness and intense physical exertion.

Chlorophyll acts as an internal deodorizer and is helpful for people with halitosis (bad breath) and body odor. It can be used as an aid to reduce digestive tract odor from a colostomy or ileostomy and also fecal odor caused by incontinence. It can also help for foul smelling gas. Chlorophyll cleanses and nourishes the intestinal tract and is healing to the mucosal lining. It can also be helpful for constipation.

Chlorophyll is an excellent whole body cleanser. It not only detoxifies the digestive tract, but also facilitates cleansing of the blood and liver and assists in the chelation of heavy metals. It is capable of neutralizing harmful oxidants and may reduce oxidative damage from certain carcinogens. It also has the ability to form tight molecular complexes with carcinogens and in doing so blocks the body's absorption of them. In a placebo controlled study conducted in China Chlorophyll supplementation was found to decrease DNA damage caused by aflatoxin, a liver carcinogen produced by fungus in moldy grains and legumes. Scientists hope that in populations with unavoidable dietary aflatoxin exposure Chlorophyll supplementation could significantly reduce the risk of developing liver cancer.

1 fl oz - Product Code: 56977
List: $10.40 ~ Discount: $8.32

Suggested Use:
Take 15-30 drops in water or juice, 1-2 times daily, or as needed.
