Lobelia 1:2

Medically, lobelia is known as a parasympathomimetic. It stimulates the parasympathetic nervous system, countering the effect of adrenal stimulation and stress.

Who can benefit from this herbal supplement?

Those suffering from excess adrenal stimulation and stress, including anxiety, panic attacks, insomnia, ADHD and nervousness. Lobelia contains an alkaloid called lobeline that is chemically similar to nicotine. Lobelia will decrease the physical craving for cigarettes as lobeline fools the binding sites that are looking for nicotine. Lobelia has historically been used to help one who wants to quit smoking. It also calms the stress one goes through and opens the lungs to help expectorate. It is perfect in its action for smoking cessation. *Phyto-Tech™ Lobelia 1:2 contains fresh lobelia inflata herb, (500 mg/ml, or 30 drops), pure grain alcohol, and pure deionized water. General, and long term dosage is 10-30 drops, 2-3 times daily in juice or water. For acute, short term needs, one can take 10-30 squirts every hour as needed. Use caution if you have low blood pressure, and do not use during pregnancy.*
