Digest Stim Complex

This formula promotes optimal digestive enzyme balance for proper digestive function. It can be categorized as a bitter digestive tonic.

Who can benefit from using this supplement? Those who are deficient in digestive enzyme secretion or gastric function. Helpful in cases of indigestion, gas, sluggish bowels, bloating.

Phyto-Tech™ Digest Stim is available in a regular, and an alcohol-free version. Most commonly, it is taken before meals. It contains the following herbs: Gentian Root, Fennel Seed, Oregon Grape Root, Ginger Root, Licorice Root, Prickly Ash Bark, Blue Flag Root, Peppermint Spirits, and Potassium Carbonate.

Phyto-Tech™ Digest Stim will stimulate the body to secrete more digestive enzymes (HCl, bile, pancreatic enzymes, pepsin, lipase, and saliva) which will enhance digestion. This makes absorption more possible. This formula actually makes the body secrete its own digestive enzymes if deficient instead of taking digestive enzymes by themselves. The goal is to get the body to function normally and to not rely on external enzymes.

It can be used as needed for meals that cause indigestion.

Phyto-Tech™ Digest Stim can be used as a tonic for those with chronic indigestion, before or after a meal, but is best when used before the meal.

Phyto-Tech™ Digest Stim also contains fennel and peppermint to soothe the digestive upset and keep the digestive tract calm while digesting efficiently.

This formula can be especially helpful to the elderly, where poor digestion is common.

Many herbalists recommend Phyto-Tech™ Digest Stim for Candida albicans. Candida thrives in a digestive tract that under secretes, thus becoming too alkaline (digestive pH is acidic, blood pH is alkaline). Phyto-Tech™ Digest Stim is thought to increases HCl in the stomach, thus keeping it very acidic which kills parasites, bacteria, germs and keeps Candida in check. Insufficient digestive enzymes result in leaky gut syndrome and the candida/parasite/germ hypothesis that cannot be healed without increasing digestive enzymes.

Contraindications: Pregnancy; Ulcers, Irritable Bowel (Phyto-Tech™ Digest Stim may help or worsen this condition--use caution)

Dosage: In general, it is best before a meal but can be used afterward.

Daily use: 15-60 drops, 2-3 times per day or as needed in juice or water. Use before or after meals.

Occasional use: 30-60 drops before or after meals that create indigestion or digestive upset.

Digest Stim Complex, 1 fl oz - Product Code: 56999
