

Oral Nutrient Chelates

(Easier to Swallow Size!)

Vitamins and minerals for a healthy circulatory system†

Dietary Supplement

Product Numbers: 03750

Product Quantities: 180 Tablets

Many factors affect the circulatory system. The liver breaks down lipids and keeps cholesterol soluble. Lipotropic factors such as beta-sitosterol, methionine, and betaine support a healthy flow of fats and bile.†

Proper calcium absorption is important, too. If body fluids become overly alkaline, calcium can be thrown out of solution. Acidifying compounds (ammonium chloride, monocalcium phosphate, betaine hydrochloride) can assist a healthy acid-alkaline balance.† Magnesium, potassium, and antioxidants contribute to artery health. †

Oral Nutrient Chelates provides all these vital nutrients with synergistic factors. This combination of nutrients also has been used in a famous German formula.
