Yohimbe Bark 1:3

Yohimbe Bark is a well known treatment form male impotence and is traditionally used as an aphrodisiac.

Who might benefit from this herbal supplement?

Those men suffering from impotence and inability to perform.

Yohimbe is for impotence in men. It increases blood flow into the penis and can help sustain an erection. It can help men who cannot get an erection and for those who cannot maintain an erection. Constant use of Yohimbe, however, can create irritability and aggravate the prostate. Try to not use it more than a few days in a row. It is possible to have success if used the day results are desired. If the impotence is not a vascular problem, Yohimbe will not work. If stress is a related issue, add Kava Kava Root. More potent preparations, typically containing higher, standardized levels of the alkaloid yohimbine, are available, but these products are best used only under the supervision of a physician. High doses of the yohimbine alkaloid can cause potentially dangerous side effects. Yohimbe bark (not yohimbine alkaloid) has a long history of use for many conditions. *Phyto-Tech™ Yohimbe Bark 1:3 is a tincture of Yohimbe Bark (Pausinystalia yohimbe), in pure grain alcohol and deionized water. It provided 333 mg/ml (30 drops). The following dosage for Phyto-Tech™ Yohimbe Bark 1:3 is recommended: For chronic impotence, take 15-30 drops 2-3 times daily, or as needed, in juice or water. For more immediate results, take 20-40 drops, once or twice, only, within a day's time. Cautions: Use caution if you have high blood pressure; do not use if you have chronic inflammation of reproductive organs or prostate; do not use long term; may potentiate pharmaceutical MAO-inhibitors.*
