Primadophilus Bifidus

Description
Primadophilus bifidus is an enteric coated, high potency probiotic product, in a convenient once daily dose. Bifidus is especially designed for middle aged and senior adults. It contains specially selected strains of freeze-dried microorganisms. Our product is kept refrigerated throughout the manufacturing process and should be kept in the refrigerated portion of you local Nature's way retailer.

Usage
Primadophilus Bifidus is designed to deliver helpful bacteria to the gut. These microorganism strains are essential to maintaining healthy intestinal flora. Under normal conditions, trillions of bacteria exist in the intestines. As part of the body's defenses they help maintain good health by preventing harmful microorganisms from infiltrating the body. Medications taken to combat illness or infection can reduce the number of beneficial bacteria as an unwanted side effect. To maintain the healthy balance add Nature's Way Primadophilus Bifidus to your daily health regimen.*

Recommended Daily Dosage
Take one Primadophilus Bifidus capsule (2.9 billion Bifidobacteria and Lactobacilli) per day. Intensive dosage: After two weeks at the usual dosage, intake may be increased to one Primadophilus Bifidus capsule three times per day. To retain maximum potency, keep refrigerated.

The following list is for serving size of 1 capsule (proprietary formula)

Primary Ingredients
Bifidobacterium breve
Bifidobacterium longum
Lactobacillus rhamnosus
Lactobacillus rhamnosus
Proprietary Blend
Vitamin C

Other Ingredients

Sizes & Suggested Retail Price
90 capsules - $17.95

Where to BUY?

Synergistic Products

Cranberry, Extract
EchinaGuard, Capsules
Garlicin
Neem

Quality Issues

Highest Potency: Minimum potency of 10 billion microorganisms per gram (2.9 billion per capsule) at time of manufacture. 100% Intestinal Release Difference: Each Primadophilus Bifidus capsule has a proprietary enteric coating that completely withstands stomach acid so it can release its full potency into the intestinal tract.

Product Q&A

1. What is the normal color for Primadophilus products?
   The normal color for Primadophilus products is off-white with brown flecks. The brown flecks are the material the bacteria is plated on. They are characteristic of this product; however, the specs will be more prominent if the product has not been stored properly (refrigerated).
