Bilberry

Bilberry is a powerful antioxidant, and is traditionally used to support eye health and visual function.

Who would benefit from taking this herbal supplement? Those who are concerned about possible eye or vision problems, including macular degeneration, cataracts.

"Billberry contains potent antioxidants that protect and improve micro-circulation, that is, the circulation of blood through the capillaries. These antioxidant pigments, called anthocyanosides or anthocyanins, are similar to those found in red grape skins. Anthocyanosides protect cells in the circulatory system, keeping them more flexible to provide better flood flow and oxygen to capillary-rich organs such as the retina of the eye. Researchers have also found that bilberry affects enzymes responsible for energy production in the eye, which is especially important to good vision under poor light conditions, including night vision.

"Bilberry extract and bilberry constituents appear to improve circulation in young and elderly people alike. Bilberry extract may be helpful in preventing many of the vision problems associated with aging. In combination with vitamin E, it can prevent cataracts; it can also prevent retinopathies (diseases of the retina), including diabetic retinopathy, and possibly even ordinary nearsightedness (myopia). Bilberry's ability to strengthen capillary circulation helps those who bruise easily, and bilberry extracts are even used before elective surgery to minimize bruising and excessive *bleeding. Increasing capillary strength also helps in treating spider veins, varicose veins, and hemorrhoids." (McCaleb, Robert, et.al., The Encyclopdedia of Popular Herbs, the Herb Research Foundation, Prima Health, 2000)*

Each 30 drops contains 500 mg of certified organic Bilberry berry.

1 fl oz - Product Code: 57043
List: $10.90 ~ Discount: $8.72

Suggested Use:
20-40 drops in water or juice, 2-3 times daily, or as needed.
