Pro•Essence® Capsules 325 mg

A non-toxic, natural treatment which supports the overall health of the prostate and the urinary system.

Pro·Essence® contains five healing herbs that work together synergistically to provide a natural boost to your general health and well being. It is a traditional detoxification formula used primarily by men concerned about prostate health, but it is also used by both men and women to maintain or improve the overall health of their urinary system. (It is well known that over half of all men over 50 experience unwelcome changes to their prostate gland.)

Pro·Essence® is also effectively used in conjunction with Flor·Essence®, as it helps to discharge the toxins being gathered and broken down by Flor·Essence®.

What Does Pro·Essence® Do?

Pro·Essence® flushes dangerous toxins out of the kidney, bladder and urinary system allowing the body to work with maximum efficiency. This formulation is composed of a selection of herbs used for the treatment of diseases of the urinary organs. If urine is being retained, the flow will be gradually increased to normal, and conversely, when urine flow is frequent, it will be gradually reduced until it is normal. At the same time the action of the bowels will be gently accelerated to increase the discharge of waste. The result is a gradual improvement in health caused by the removal of waste matter through the urinary tract and the bowels as the functions and activities of these organs are co-ordinated.

The most beneficial results are found to occur when Pro·Essence® is used in dealing with problems of the prostate gland, and with enlargements or inflammations of any of the urinary organs.

It is also effectively used with Flor·Essence®, as it helps to discharge the toxins being gathered and broken down.

Benefits:

- Effective support for the urinary tract
- Normalizes and strengthens the eliminatory organs.
- Soothes as it strengthens and revitalizes.
- Gentle positive cleansing action.
- Enhances the body's natural healing.
