Usage
Biotin helps maintain normal energy production. It is an enzyme which assists in the release of energy from carbohydrates and in the production of fatty acids. Biotin also assists in activating the energy transfer molecule ATP. Biotin is also necessary for folic acid to be converted into its biologically active form. Biotin is active in many enzyme systems in the body. Biotin assists zinc and extends the effectiveness of this mineral. It is necessary for production of normal skin and scalp secretions.*

Recommended Daily Dosage
Dissolve one lozenge daily in mouth.

The following list is for serving size of 1 lozenge

Primary Ingredients	***Amount***	***USRDA***
Biotin, biotin triurate	1000 mcg	333%

Where to BUY?

Synergistic Products
Daily Two Multi Iron-Free
Gotu Kola
Hair & Skin Formula
Vitamin B-Stress

Additional Information
Because B-vitamins work in tandem, it is important that they all be taken. However, this does not mean they must be taken in the same amounts, indeed the RDAs vary for each. Once a basic B complex is taken, extra amounts of any of the B-vitamins can be taken.
