Brain Bio Boost Complex

Supports healthy cognitive function, focus and memory, increasing overall cognitive ability and vitality. The elderly find this formula especially helpful.

Who would benefit from this supplement? Those with memory loss, confusion, Alzheimer's disease, dizziness, tinnitus, ADHD and ADD. This is an ideal supplement for college students and others facing demanding mental challenge. It is best used long-term.

Phyto-Tech™ Brain Bio Boost Complex contains the following herbs: Gotu Kola Leaf, Ginkgo Leaf, Green Tea, Codonopsis Root, Licorice Root, Rhodiola Root.

Phyto-Tech™ Brain Bio Boost Complex is a blend of herbs thought to increase overall cognitive ability, energy and vitality. It improves memory and concentration. It is indicated for those with age-related cognitive decline as well as for those who are faced with heavy cognitive demands, such as college students It can help in Attention Deficit Hyperactivity Disorder (ADHD) by helping one pay attention, sit still and process information.

Supportive Information:

Ginkgo is for cerebral vascular insufficiency and works by cerebral and peripheral blood flow. As one gets older, blood flow to the brain and to peripheral tissue decreases with these resulting symptoms. Diminished cerebral circulation can also result in vertigo, ringing in the ear, Alzheimer's symptoms, forgetfulness and depression. Ginkgo can help all of this. Ginkgo is famous in assisting memory, focus and cognition.

Gotu Kola reduces adrenal corticosterone blood levels during stress. It is high in flavonoids and studies show it helps in capillary fragility and strengthens vascular integrity in the brain and throughout the body. It is a cognitive stimulating herb for use in fatigue, confusion and general lethargy. It is helpful for those exhausted from emotional upheaval or excessive work habits.

Green Tea is a potent antioxidant that binds with free radicals to neutralize their harmful effects. Green Tea is rich in polyphenols and one in particular called a catechin. Catechins are 40 to 200 times more effective in seeking out and destroying free radicals than Vitamin A, C and E. Studies demonstrate the antioxidant effects of green tea catechins improve overall reference and working-memory related learning ability. Green Teas polyphenols are also believed to help ward off neurodegenerative diseases such as Alzheimer's and Parkinson's by protecting neurons against the harmful effects of reative oxygen species (ROS) and nitric oxide (NO).

Rhodiola stimulates the activity of serotonin, dopamine, and norepineprhine in the cerebral cortex, brain stem and hypothalamus, and increases the permeability of the blood brain barrier to precursors of dopamine and serotonin. This enhances the effects of these neurotansmitters on the brain and improves cognitive functions (thinking, analyzing, evaluating, calculating and planning), learning, attention span, memory and work productivity. Rhodiola also relieves fatigue and normalizes mood in depressed individuals, and has antioxidant properties that help protect the

Suggested Use:
20-40 drops in juice or water, 2-3 times daily, or as needed.

nervous system from oxidative damage. By stimulating cognitive function, improving resistance to stress and fighting free radicals, Rhodiola can have immediate effects on cognitive function and memory and can also provide long-term support to help preserve future brain functions.

Codonopsis is very similar to ginseng, but milder and more neutral in energy. It increases stamina and alertness and keeps the body and mind strong when under stress.

Licorice works as a limbic (emotional) brain tonic and tonifies the stress axis (hypothalamus, pituitary, adrenal axis). Researchers have found a compound in licorice known as carbenoxolone inhibits an enzyme in the brain involved in making stress-related hormones which have been associated with age related mental decline.

Phyto-Tech™ Brain Bio Boost Complex cannot be expected to work overnight and is best if used consistently for at least 2 weeks. It can be continued as a long-term tonic, especially in the elderly.

Dosage: 20-40 drops in juice or water, 2-3 times daily or as needed

Cautions and Contrindications: While interaction unlikely, those taking prescription blood thinners, or MAO inhibitors should advise their physicians. Do not take during pregnancy, if nursing, or preparing for surgery. The amount of licorice in this formula is theorectically too low to affect blood pressure, but those with high blood pressure should monitor their BP as a precaution.
