Cleanse Complex 1:2

A herbal formula based on traditional concepts of a rapid, systemic (full body) cleansing.

Many of the herbs used in Phyto-Tech™ Cleanse Complex have a long tradition of use in naturopathic medicine for many toxic conditions. The theory behind using Phyto-Tech™ Cleanse Complex is that it will result in blood and tissue cleansing through stimulating the organs that do this innately, including the liver, urinary tract, skin, lymph and bowels.

Herbs do not really actually cleanse the blood and tissues directly, but instead, stimulate the organs to increase the rate in which they do this naturally. Phyto-Tech™ Cleanse Complex will help in the elimination of cellular metabolic waste, dietary toxemia and environmental toxins. It is indicated for internally and externally generated toxins. Detoxification is thought to help stimulate organs that eliminate the toxemia from drug usage. It can be used in smaller more moderate doses if a slower cleanse is desired. Faster cleanses can result in more uncomfortable acute healing symptoms that might not be desired, but are usually harmless (i.e., loose stool, nausea, headaches, skin discharges). These symptoms can be avoided by decreasing the dose or pace.

Phyto-Tech™ Cleanse Complex works best in conjunction with other cleansing protocols, such as dietary changes, increasing water consumption and exercise.

Phyto-Tech™ Cleanse Complex contains the following herbs: Oregon Grape Root, Red Clover Blossoms, Fresh Burdock Root, Fresh Dandelion Root, Alfalfa Leaf, Yerba Mansa Root, Red Root, Vegetable Glycerin, Deionized Water, Natural Flavors
