Systemic Detox

This detoxifying herbal formula facilitates a full body (systemic) cleansing.

Who might benefit from this herbal supplement?

Those who are concerned about exposure to internally and/or environmental toxins; those who are concerned about the toxemia from drug usage. This synergistic blend of herbs is designed to affect multiple organ systems, as follows:

- **Liver: Oregon Grape, Burdock, Yellow Dock, Dandelion, and Red Root**
- **Urinary Tract: Burdock, Dandelion Root**
- **Lymph: Red Root, Red Clover**
- **Skin: Red Clover, Burdock, and Yellow Dock**
- **Small Intestines: Yellow Dock**
- **Large Intestines (colon): Yellow Dock**
- **Blood: Red Clover, Nettles**
- **Circulation: Ginger**

Many of these herbs have a long tradition of use in naturopathic medicine for many toxic conditions. Using Systemic Detox will result in blood and tissue cleansing through stimulating the organs that do this innately, including the liver, urinary tract, skin, lymph and bowels. Herbs do not really cleanse the blood and tissues but instead, stimulate the organs to increase the rate in which they do this naturally. Systemic Detox will help in the elimination of cellular metabolic waste, dietary toxemia and environmental toxins. It is indicated for internally and externally generated toxins. Detoxify helps stimulate organs that eliminate the toxemia from drug usage. It can be used in larger more frequent doses if a faster cleanse is desired, or in moderate doses for a slower cleanse. *Phyto-Tech™ Systemic Detox contains the following: Fresh Burdock Root, Yellow Dock Root, Oregon Grape Root, Fresh Dandelion Root, Red Clover Flowers, Nettles Herb, Red Root, Fresh Ginger Root, Grain Alcohol, Deionized water. Caution: Temporary discomfort can occur during "detoxification" protocols. The value and efficacy of "detoxification" is somewhat controversial, and may not be supported by medical evidence. This product is contraindicated during pregnancy and nursing. This product may affect the rate of metabolic breakdown of certain medications, expecially those metabolized in the liver--consult a physician if you are taking such medications.*

As these herbs can increase bile from the liver for fat digestion and hydrochloric acid from the stomach for protein digestion, thereby decrease metabolic waste form incomplete digestion. This will assist those who need digestive enzymes. As a consequence of increased innate digestive enzyme output, peristalsis will increase to help assist normal healthy bowel function. It is not so much a laxative as a regulating agent for sluggish bowels *Dosage: Regular cleansing: 15-60 drops 2 to 3 times per day in juice or water; Fast cleanse: Take up to 3 squirts (1 squirt is 30 drops) 4 to 6 times per day in a little water; Overall, adjust the dose to the intensity of the cleansing process and pace desired.*

Complementary Formulas:
For more focus on the liver, add Phyto-Tech™ Liver Support formula.
For additonal digestive system focus, add Phyto-Tech™ Digest Stim Complex.

1 fl oz, Prod Code: 56970
