Liquid Molybdenum 1 fl oz (30 ml)
70700

Liquid Molybdenum is a diluted solution of ammonium molybdate. Molybdenum is involved in several enzyme functions including uric acid formation, the detoxification of sulfites, alcohol and some chemicals, as well as the metabolism of sulfur. Sulfite sensitivity may indicate a potential need for molybdenum supplementation. We believe that this is probably the best absorbed form of molybdenum available.*

Each drop (0.05 ml) contains:
Molybdenum (as Ammonium Molybdate) 25 mcg
Other ingredients:
Purified water, lactic acid, citric acid, potassium sorbate, benzyl alcohol.

Suggested use:
As a dietary supplement, 1 to 3 drops once or twice daily, or as directed by a healthcare practitioner.
