- Supports Joint Flexibility
- Added Glucosamine for additional joint support
- Gluten-Free

Certified GF Gluten-Free

CELEBRATING 40 YEARS Country Life®

of Delivering High Quality, Natural Vitamins and Supplements

Bioactive Type II Collagen

FLEX-Able™

A reduction in joint mobility, comfort and flexibility often occurs with age. This is a growing concern for millions as this may affect a person's ability to perform some of the simplest day-to-day tasks.**

FLEX-Able™ is a unique combination of UC-II® and Univestin®.

- Supports Joint Mobility**
- Supports Joint Comfort**
- Supports Joint Flexibility**
- Gluten-Free

UC-II® is a unique form of Undenatured, Bioactive Type II Collagen. UC-II® is manufactured using a patented low heat process which preserves the triple helical structure of the Type II Collagen that may be destroyed in other forms of Type II Collagen that are on the market. The unique properties of UC-II® assist with some biological activities in the body to support joint health.** A human clinical research study showed that UC-II® was 2x more effective than a combination of 1,500 mg Glucosamine Hydrochloride and 1,200 mg Chondroitin Sulfate to support joint health.** The UC-II® patented process makes it possible to support joint health with just 40 mg a day compared to comparable joint products that use a denatured Type II Collagen at a suggested use of 2 to 4 grams per day.**

Univestin® is a unique herbal combination that has been shown in a human clinical study to support joint comfort.**

** These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.
