[Direction for Use]

As a dietary supplement, take 2 capsules twice a day between meals or as directed by your practitioner.

[Product Description]

Grifron® Maitake D-Fraction® (Capsules) is a combination of **whole Maitake mushroom powder** and standardized **active glycoprotein** in a capsule form.

This product is most suitable for regular health maintenance for healthy people. For other purposes "Grifron®-Pro" line with professional strength is recommended.

Maitake mushroom (*Grifola frondosa*) is an edible tasty mushroom prized in Asian countries for centuries. Since the 1980s Maitake mushroom became a subject of scientific studies, and researchers found that it supports healthy immune functions, healthy blood glucose levels and healthy blood pressure in laboratory animals.*

The **active proteoglucan**, often referred to as **D-fraction** by scientists, is a unique beta-glucan conjugated with protein, which has been identified and isolated as a responsible substance for potent immune-activating property of Maitake mushroom.*

Our marketing history shows that **Grifron® Maitake D-Fraction® (Capsules)** is very safe and well tolerated. However, in rare cases, it may cause a mild stomach upset or soft bowels in sensitive people. Taking the product with meals sometimes helps alleviate such discomfort.

Grifron® Maitake D-Fraction® (Capsules) contains **no alcohol, sugar, yeast, mold, gluten, dairy products, artificial colors, preservatives, pesticides, herbicides or fertilizers**.

Maitake D-Fraction® is the registered trademark of Maitake Products, Inc. which holds the exclusive right to use the trade name.
