Buy

Cat's Claw or Uña de Gato (*Uncaria tomentosa*) is an herb that grows wild in the highlands of the Peruvian Amazon. The native Ashanica Indians have used the inner bark of cat's claw for possibly thousands of years to support immunity and digestion. Recent research in Europe and China has identified the alkaloid compounds in cat's claw that possess antioxidant properties. They have been shown to be potentially beneficial for healthy immune and gastrointestinal function.* Our cat's claw is harvested with environmental consciousness and only the inner bark is used.

Each capsule contains:
Cat's Claw inner bark (*Uncaria tomentosa*) extract 565 mg
Other ingredients:
Magnesium stearate.

Suggested Use:
As a dietary supplement, 1 or 2 capsules two or three times daily with meals, or as directed by a healthcare practitioner.
