NAC (N-Acetyl-Cystein)(capsules)

L-Glutamine 750

120 Capsules
750 mg each
Pharmaceutical Grade
Prod # 15012

Related books

USAGE: Take 1 to 6 capsules per day between meals or after a workout, or as directed by yourqualified health consultant.

Glutamine is the most abundant amino acid in the body and is involved in many metabolic processes. Skeletal muscles are the primary sites of glutamine concentration. Glutamine protects muscle tissue and supports immune function during periods of immune and muscular stress. Glutamine supplementation supports protein synthesis as well as the rate of glycogen production (by serving as a carbon donor). Glutamine supports integrity of intestinal mucosal cells and nucleotide synthesis by lymphocytes.
Keep out of reach of children.
