Sano-Gastril 24 individually wrapped tablets
72480

A fermented soy product, developed to support digestion in the stomach and neutralize excess hydrochloric acid to a physiologically more appropriate level, without changing the stomach pH and without the use of alkalinizing agents. *Glycine maximus* (soy) is fermented by a special strain of lactobacillus (Lb 51). The result is a complex possessing antimicrobial properties, buffering potential and containing peptides, amino acids and other metabolic substances. Fast acting for heartburn. Product of France.*

Each tablet contains:
Fermented Soya (*Glycine maximus*) extract 1.5 g
Other ingredients:
Fruit juice, glycerol stearate, colloidal silica.

Suggested Use:
As a dietary supplement, 1 to 3 tablets chewed or sucked, between meals, as desired, or as directed by a physician.

*These statements has not been evaluated by the U.S. Food and Drug Administration. The product is not intended to diagnose, treat, cure, or prevent any disease.
