Slowing the effects of aging has been studied for years. And while the fountain of youth has yet to be discovered, there are things we can do to aid in this timeless struggle. NOW's CoQ10 with Vitamin E delivers the perfect balance of these two heart healthy supplements. CoQ10, a vitamin-like substance that occurs naturally in the body is one of the most abundantly present nutrients in the human heart. When combined with vitamin E, known especially for its ability to produce healthy red blood cells and subdue oxidation, the end result is a potent formula ideal for anyone with a cardio-conscious mindset.*
