Relora®

For Stress-Induced Eating

enlarge bottle

Relora is a patent pending plant extract of Phellodendron amurense and Magnolia officinalis that may help to relieve stress and minimize stress-induced eating. Weight gain can be associated with emotional over-eating for people with stressful lifestyles. Preliminary research suggests that Relora may help regulate cortisol levels in the body that are associated with stress-related weight gain. The bark of Magnolia officinalis has been used in traditional Chinese Herbalism for centuries for stress reduction and muscle tension.

Supplement Facts for 250 mg

Serving Size: 1 tablet

	Amount	%DV
