Saw Palmetto Extract with 2mg Lycopene

Code 4551 (160mg / 60 Softgel Capsules)

buy now

Saw Palmetto berry (Serenoa repens, Sabal serrulata) consists of the ripe, dried fruit of Serenoa repens. The berry contains fatty acids (principally lauric acid and ethyl laurate), with phytosterols and polysaccharides.

Nearly every man over the age of 45 has some enlargement of the prostate gland. Enlargement and inflammation of the prostate can hinder urine flow and affect sexual function. BPH (benign prostatic hyperplasia) results in frequent nighttime urination, pain, burning and difficulty with urination. Conversion of testosterone to dihydrotestosterone is a chemical reaction that contributes to prostate enlargement and its symptoms. The berries of the Saw Palmetto plant have been shown to inhibit this chemical reaction.* By standardizing the fatty acids in Saw Palmetto to between 85 and 95%, Natural Factors delivers a Standardized Potency herb extract for men.

Also available:
160mg / 90 Softgel Capsules - 4552

Suggested Usage:
1 capsule, 2 - 4 times per day or as directed by a health professional. Keep out of reach of children. Notice: With your regular medical checkups it is advised to include a prostate exam and to advise your doctor you are taking this product.
