Milk Thistle Phytosome™

Code 4800 (150mg / 90 Capsules) buy now

Natural Factors Standardized Milk Thistle Phytosome™ capsules are standardized to 80% Silymarin, a mixture of valuable flavonolignans, bound to phosphatidylcholine (from lecithin) to enhance bioavailability. Numerous clinical studies show that Silymarin supports and promotes liver function in healthy individuals. It provides a protective, antioxidant effect on the liver, fortifying it against the undesirable effects of alcohol, smoke and harmful chemicals. These special qualities make it especially valuable for people in polluted environments.
Dandelion and Turmeric have been traditionally used and scientifically studied for their support of liver health.*

Phytosomes™ are herbal substances that are combined with phosphatidylcholine molecules to enhance absorption and bioavailability. This new molecule is both water and fat soluble.

Suggested Usage:
Take 1 capsule, 3 - 9 times per day with meals or as directed by a health professional.
Contains no artificial preservatives, color, corn, dairy, gluten, starch, sweeteners or yeast.

Supplement Facts

Serving Size 1 Capsule
