Hyaluronic Acid Injuv™

enlarge bottle

Injuv is a revolutionary hyaluronic acid product. Hyaluronic acid is found in the spaces surrounding our cells, with the highest concentrations found in soft connective tissue, such as skin and cartilage. Hyaluronic acid plays an important role in maintaining and regulating the water balance of tissues and facilitating the transport of nutrients and waste. It is a major component of joint tissue and influences the hydration of cartilage, which is necessary for its resilience and elastic strength. The hyaluronic acid molecule in Injuv has been enzymatically cleaved into smaller fragments.

Supplement Facts for Softgels

Serving Size: 2 softgels

	Amount	%DV
Injuv™	140 mg	
Yielding 9% Hyaluronic Acid	12.6 mg	†
