vitamins and SUPPLEMENTS DAVINCI

Since 1973
Recommended By Leading Doctors

Methylsulfonylmethane 1000™

A dietary supplement to support joint function and skin health.* This naturally occurring sulfur compound has a vitamin-like normalizing influence on body functions. A low concentration of MSM blood levels has been associated with both psychological and physical stress, organ and tissue malfunction, fatigue, and susceptibility to disease. It has been used as a nutritional support when allergies are present as well as for digestive complaints and chemical sensitivities because it coats the entire digestive tract, making it harder for most allergens to bind and cause damage.* It helps to regulate pro-inflammatory enzymes associated with connective tissue dysfunctions. MSM is a precursor to the body s production of Methionine (helps prevent fatty deposits in the arteries) and to powerful antioxidants that help protect the liver, lungs, digestive organs and blood cells.*

Methylsulfonylmethane (MSM) is a source of sulfur, one of the major building blocks of glycosaminoglycans (GAGs). GAGs are key structural components in cartilage and are essential to joint and skin health.*

Other ingredients: microcrystalline cellulose, stearic acid, vegetable stearate, croscarmellose sodium, silicon dioxide.

Suggested Use: As a dietary supplement, take 1 tablet 3 times daily with meals.

Methylsulfonylmethane 1000" 2392

2392.18 (180 tablets)
