Trust The Leaf™

Ginkgold EYES

Description
Ginkgold is the original and patented ginkgo extract (U.S. patent #5399348). For years, it has been a best selling natural health care product in Europe and the United States. And it's the only ginkgo extract used and recommended by doctors and other healthcare professionals in over 70 countries, outselling all other ginkgo products combined worldwide.

Scullcap

Tru-OPC's™, 75 mg.

Quality Issues

Ginkgold contains the only ginkgo biloba extract proven through comparative research to stimulate activity in all areas of the brain. Other brands claiming to be similar to Ginkgold stimulated only limited portions of the brain. Ginkgold has been exclusively shown to promote potent alpha-enhancing effects that can be classified as a cognitive activator. Backed by over 30 years of extensive research, including more than 400 published scientific and clinical studies, Ginkgold is the most effective ginkgo product on the market today. In fact, Ginkgold was the extract used in the breakthrough study published in the Journal of the American Medical Association.
