24 billion viable/active cells

Availability:

VegCap

30 & 60 vegetarian capsules (dairy free)

Seniors generally need a large quantity of beneficial bacteria and several varieties of bifidobacteria for optimum bowel health. High concentrations of acidophilus in the absence of bifidobacteria may tend to constipate. This formula has been specifically designed with an emphasis on the particular bifido strains necessary for health and longevity in seniors.

This blend is also indicated for adults under age 65 who are experiencing lower bowel symptoms such as chronic diarrhea &/or constipation, often indicators of more serious conditions.

The specific strains used in Advanced Adult's blend have been specially chosen for their value to lower bowel health and have been formulated to the appropriate viable count.

Ingredients: Each vegetarian capsule is guaranteed to contain not less than 24 billion total viable cells (at time of manufacture) of:

Lactobacillus casei: 20%
Lactobacillus rhamnosus: 20%
Lactobacillus plantarum: 10%
Bifidobacterium bifidum: 10%
Bifidobacterium breve: 10%
Bifidobacterium longum: 10%
Lactobacillus acidophilus: 10%
Streptococcus thermophilus: 7%
Lactobacillus bulgaricus: 3%

In a base of: microcrystalline cellulose, magnesium stearate, ascorbic acid

Suggested Use: Consume one capsule per day on a full stomach to maintain healthy intestinal flora or three capsules per day on a full stomach as a therapeutic treatment when suffering from intestinal disorders.

Storage: Advanced Adult's blend may be frozen. Refrigeration ensures maximum potency and stability however; Advanced Adult's blend can be left unrefrigerated for short periods of time, making it convenient for travel.
