Vinpocetine

Promotes Cerebral Metabolism

enlarge bottle

Vinpocetine is a derivative of vincamine, a key component of the lesser periwinkle plant. Research suggests vinpocetine may improve cognitive performance and short-term memory loss that is sometimes experienced with stress or aging. Animal studies have shown that vinpocetine significantly increases circulatory parameters including total cerebral blood flow.

Supplement Facts

Serving Size: 1 tablet

	Amount	%DV
Vinpocetine	10 mg	†

Other Ingredients: microcrystalline cellulose, stearic acid, and magnesium stearate.
