Cholesterol Success

Is Cholesterol Success Right for You?

Cholesterol Success can be taken alone, or in combination with a diet and exercise program. Additionally, Cholesterol Success can be used by those who do not have elevated LDL cholesterol levels, but who wish to be proactive in maintaining healthy cholesterol levels. Speak with your doctor about whether the use of Cholesterol Success may replace the need to take any other cholesterol lowering product.

How Does Cholesterol Success Work?

The four phytosterols work synergistically to help block the absorption of cholesterol (both dietary and biliary cholesterol is blocked). The cholesterol is then excreted without entering the blood stream.

When Can You Expect to See Results?

The supplement begins to work after 30 days with full benefits showing after 60 days. It might be a good idea to have your cholesterol checked after a full 60 days in order to determine how well Cholesterol Success is working for you.

Is Cholesterol Success Safe?

Over 40 years of clinical trials have demonstrated the long-term safety and effectiveness of phytosterols, the major component of Cholesterol Sucess.

Put Your Trust in Twinlab
