Product Detail

Amyloban® 3399 from Lion's Mane (Tablets), 180 ct

Product Code:
Price:
Stock Status:
Quantity:

[Ingredients]

Serving Size : 2 tablets

Servings per Container : 90

Amount per Serving :
Lion's Mane Standardized Extract PLM-Fraction (hericenones 0.5%, amyloban 6%) 650 mg*

Other Ingredients:
Microcrystalline Cellulose, Dicalcium Phosphate, Sucrose Fatty Acid Esters, Silicon Dioxide

*Daily Value not established.

[Direction for Use]

As a dietary supplement, take 2 tablets 3 times a day with meal or as directed by your practitioner.

[Product Description]

Amyloid is a protein that deposits in the body's cells and may accumulate between the nerve cells (neurons) in the brain as we age. Recently, we have successfully isolated a substance (amyloban) from a mushroom called Lion's Mane (*Hericium erinaceum*) that has been shown to support the survival of nerve cells in the circumstance that modeled after the toxicity of amyloid (Japanese patent 394,3399)*. Also, research indicates that other active compounds (hericenones) from the same mushroom may stimulate the production of Nerve Growth Factor (NGF) in the brain.*

Amyloban® 3399 is an advanced dietary supplemant based on an innovative extract containing both of the above active substances which is developed by our research team with a collaboration of inventors in Japan, China and USA (US patent pending).
